Preparing For Disaster

Being prepared for disaster is important. When disaster strikes, you may not have ample time to respond and ensure the resources you and your family need to survive are available. Moreover, hundreds of other families in your area share the same concerns, and it will be difficult to get access to the necessities you need due to shortages and competition. Do not wait until the last minute and get caught in this situation. Disaster-time civilian response requires sound decision-making and action to save the lives of families and friends.

When determining your emergency needs, plan for the long haul. In any major disaster scenario, it may take 72 hours or more for emergency personnel to reach you. Emergency preparedness kits should contain the essentials your family needs to survive during a disaster. Having two is ideal; a multi-purpose kit that with provisions for more activities for the home, and a transportable slimmed down kit with bare necessities for survival when on the go. Any preparations should be accompanied by an emergency plan. Know where your family is and how to keep in contact in the event of a disaster. Most of all keep informed. Find out what disasters you may be affected by and plan accordingly. Determine and manage your emergency needs as required.

Have a plan

Your family may not be together when disaster strikes, so it is important to plan in advance: how you will contact one another; how you will get back together; and what you will do in different situations.

It may be easier to make a long-distance phone call than to call across town, so an out-of-town contact may be in a better position to communicate among separated family members.

Be sure every member of your family knows the phone number and has coins or a prepaid phone card to call the emergency contact.

You may have trouble getting through, or the telephone system may be down altogether, but be patient.

You may also want to inquire about emergency plans at places where your family spends time: work, daycare and school. If no plans exist, consider volunteering to help create one. Talk to your neighbors about how you can work together in the event of an emergency. You will be better prepared to safely reunite your family and loved ones during an emergency if you think ahead and communicate with others in advance.
