

Aloha my name is Jeanette Baysa and I'm here to ask the board for approval to form a mail park beautification committee.

From the beginning of learning about this project, a few of our neighbors started discussing about how we envisioned what the mail parks would look like, even before any plans were in place. We envisioned a park area with benches where neighbors could sit and chat; with beautiful and native plants along walking trails; a place where kids could play; neighbors could bring their dogs. These were very tall wishes.

Now with the mail parks in progress, we'd like to start making those visions into reality. It would be a total volunteer committee. No funding is being requested from HPPOA. All time, materials, expertise, and equipment will be donated.

I've been drafted, ummm volunteered to bring interested neighbors together.

What do you think?
