

# Road Superintendent Report

October 21, 2026

For the month of September 2026

In the month of September, the road crew responded to 102 road maintenance requests and 15 dust complaints (water requests).

Attached are maps showing which areas were serviced during the month. I believe they are self-explanatory, but I am happy to answer any questions you might have.

We purchased a total of 356 tons of rock and 42.46 tons of asphalt.

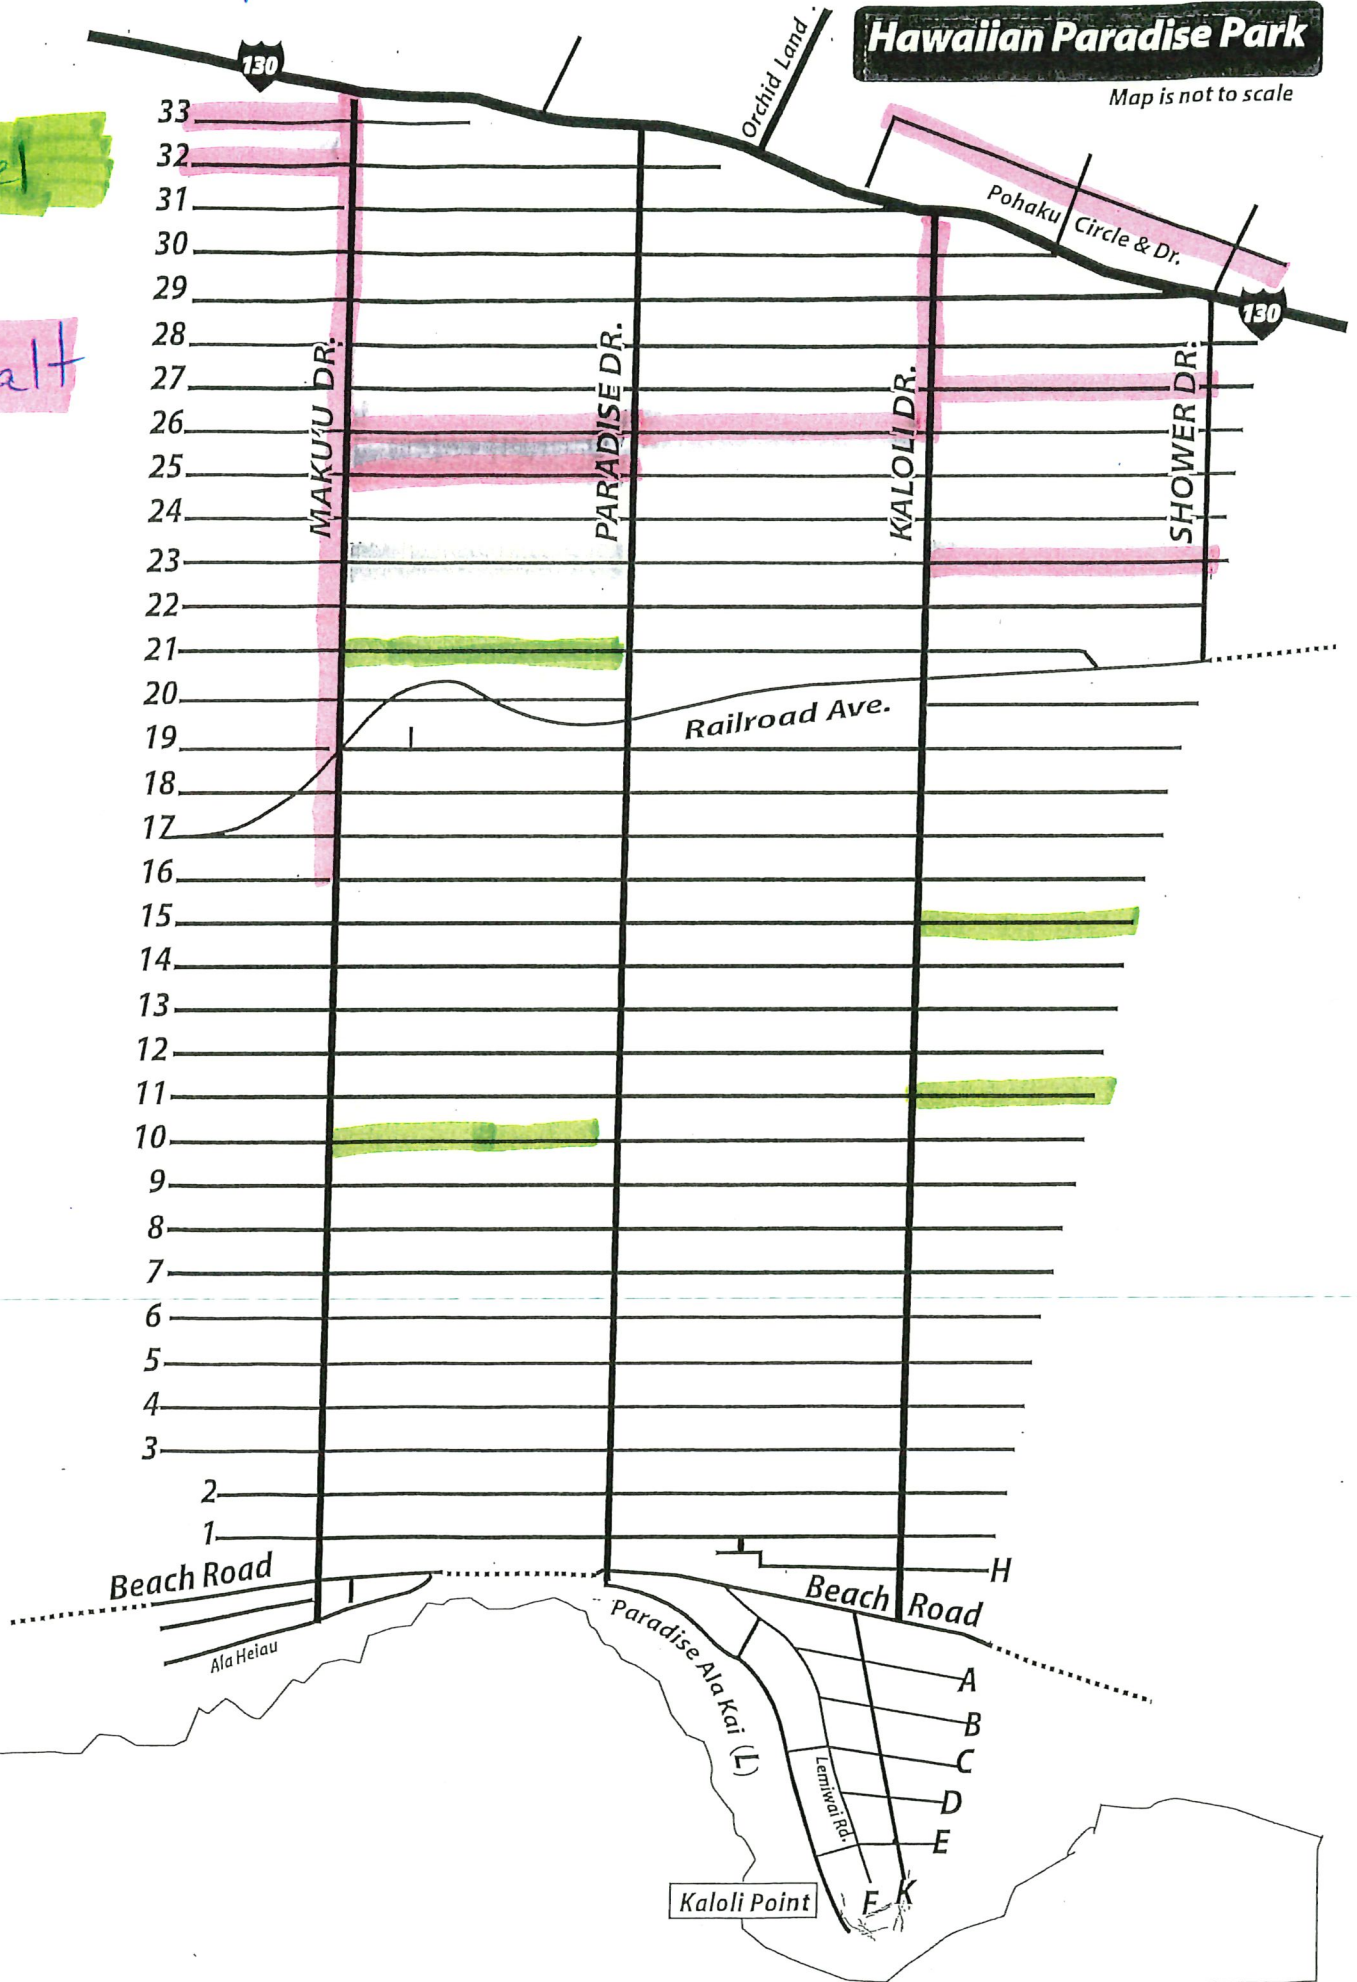

We picked up 5 dead animals and 0.5 tons of rubbish (including a dryer and a hot water heater) to haul to the waste station, in addition to the dumpster load that is picked up at the shop every week.

We have had multiple pieces of equipment out of service for repair. The grader is still out of service (as of 10/14/26), although it should be repaired and back in service by 10/16/26. Once it is, we can finish prepping 10<sup>th</sup> Maku'u-Paradise for paving, and then it will be back into the grading gravel roads rotation. Both sidearm mowers have experienced issues and are currently out of service (as of 10/14/26). The Challenger may be repaired and back in service within the next week, but the John Deere required parts that had to be ordered and could be down for 2-4 weeks.

# Pothole Repair 9-1 to 9-20-26
